Patient Spotlight

By Russ, age 39

"I have been disabled my entire life with an incurable degenerative disease called Friedreich's Ataxia. I was diagnosed at 15 and wheelchair bound since 21. My condition has become severe enough to not allow me to make the simple transfers from my wheelchair to bed and the like. Get Involved

When we do raise the money for an event booth, we need volunteers to come help collect signatures. Many people need to be asked to sign as they are walking by our booth. Many more won't make it by our booth, so we need people walking around the event with signs asking others to sign the petition. It is really fun and we meet the greatest people. Please come out and help!
